54133	1.0					Engineering Services	The application of physical laws and principles in the design, development, and utilization of machines, materials, instruments, structures, processes, and systems. The services included in this group include the provision of designs, plans, and studies related to engineering projects. Engineering advisory services that are related to a specific project are classified in product groups 1.1, 1.2, 1.3, 1.4, 1.5, 1.6, 1.7, 1.8, and 1.9. Those that are not related to a specific project are classified in product group 1.10. Design-build contracts, in which the respondent takes on the construction risk as well as the engineering design risk, are classified in product 2.2.2. However, if engineering design services for a design-build project are provided on a sub-contract basis, the sub-contract is included under the appropriate engineering project group. 54133	1.1	X				Residential Building Engineering Projects	All engineering services related to new and existing homes, row housing, apartments, etc., and mixed-used buildings that are predominantly used for residential housing. The services included in this group include the provision of designs, plans, and studies related to residential building projects. Engineering advisory services that are related to a specific residential building project are classified in product group 1.1, whereas those that are not related to a specific project are classified in product group 1.10. Design-build contracts, in which the respondent takes on the construction risk as well as the engineering design risk, are classified in product 2.2.2. 54133	1.8					Hazardous and Industrial Waste Engineering Projects	All engineering services related to systems for the collection, treatment, and disposal of hazardous and industrial waste and the control of pollution. The services included in this group include the provision of designs, plans, and studies related to hazardous and industrial waste projects. Engineering advisory services that are related to a specific hazardous or industrial waste project are classified in product group 1.8, whereas those that are not related to a specific project are classified in product group 1.10. Design-build contracts, in which the respondent takes on the construction risk as well as the engineering design risk, are classified in product 2.2.2. However, if engineering design services for a hazardous or industrial waste design-build project are provided on a sub-contract basis, the sub-contract is included under this project group.
